

new! The Remote Advantage

EziCaddy Remote Advantage MotoBrake EVA

The Remote Advantage - Remote Start and Brake - the better alternative to a Full Remote.

The Remote Advantage MotoBrake EVA can be controlled by using the small remote transmitter provided. The transmitter is the same size as the one for your car lock . You can attach the Remote Control transmitter to you belt loop so it is not in the way and is always available for use when you choose to start or stop your buggy.

The Remote Advantage MotoBrake EVA can be pointed in the right direction and the remote control button pressed causing the Remote Advantage MotoBrake EVA to move off at around 90% of full speed. To Stop the Remote Advantage MotoBrake EVA press the remote control button again and the MotoBrake will stop the Buggy, even going downhill, only one button to both start and stop your buggy. The Remote Advantage MotoBrake EVA can also be controlled using the on/off switch and speed control knob located on the new larger D handle. The Remote Advantage MotoBrake EVA operates automatically, you choose the speed and the MotoBrake maintains that speed downhill, no need to even hold on to the Buggy. The Buggy will continue downhill at your pace until you stop it manually or remotely.

Once you reach the Green you can point the Remote Advantage MotoBrake EVA in the direction of the next tee and after you have finished putting you can press the remote and meet your Remote Advantage MotoBrake EVA at the next tee. The Remote Advantage MotoBrake EVA has only one Motor/Gearbox so it is lighter, more compact and you do not need an extra large battery.

The Remote Advantage MotoBrake EVA includes a 20Ah Battery in a Carry Bag, Automatic Battery Charger, Sand Bucket, EVA Tyres, retractable 4th wheel, Deluxe Box Seat & Sprung Stem.
